Small Beginnings
The Tiny Baby Company

Better for the Baby
Better for the Nurse
Better for the NICU-Hospital
Better Time X3

To all the RNs, RTs, OTs, PTs and other healthcare professionals;

This letter is dedicated to all of you who have supported or helped us to bring innovative products to neonatal intensive care units around the world. Your desire to do your best for the infants in your care is the reason Small Beginnings Inc. is considered a leader in producing great, patented neonatal products. When you call us about products that won't work, we roll up our sleeves and create solutions.

Our mission statement is as true today as it was when we started. We are "Clinicians on a Mission" and we strive to meet your needs and make products that are the best. "Better for the Baby, Better for the Nurse, Better for the NICU/Hospital, Better X3". Better means; safer +, easier +, and more economical +.

It is this philosophy that has hospitals and entire hospital systems converting to our amazing product line that improves outcomes for the NICUs while saving thousands of dollars. We are proud to bring the best of innovative products year after year and will continue to do so.

Our sincere thanks,

M. Sharon Rogone RNC-E
Chief Operating Officer
Small Beginnings Inc.

A Certified Woman Owned Business

Latex-Free

Bili-Bonnet

Stretches open to allow Bili-light to penetrate the entire head.
3 Sizes Fit all head shapes.

- No Confusion
- Easy to apply
- No straps to frustrate
- No adhesives to damage skin

Compression Technology

- Makes ours the only mask with minimal light penetration
- Rests on ocular face bones and removes pressure from eye
- Mask is Reversible made of PE Foam & Brushed Nylon
- Conforms to baby's face with plenty of room for adjustment on each side

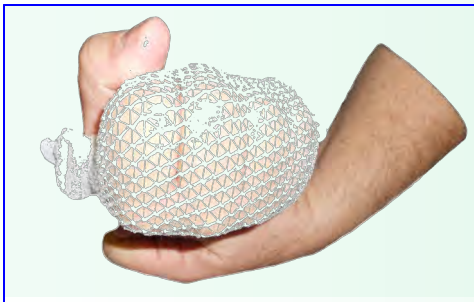
Tabs are rounded & very low profile hook & loop that allow attachment at any angle to maximize fit and minimize slippage.

Order #	Product Description	Bx Qty
Bili-Bonnet Phototherapy Masks		
01A	Preemie size for infants approx. 27-30 weeks	50
01B	Newborn size for infants above 31 weeks approx.	50
01C	Ultra preemie size for infants below 27 weeks approx.	50

Bili-Bonnet

Latex Free-No adhesives

How to put the patented Bili-Bonnet phototherapy mask on correctly



Remove from package, then stretch gauze and pull over fist to create a bonnet.

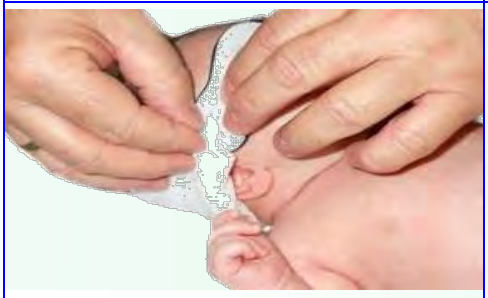
Stretch bonnet over baby's head to go from the nape of the neck to the forehead.

Attach velcro tab to one side. Note, the mask has a 1 inch area for better adjustment & velcro tabs are rounded .

Repeat with tab on other side. The mask should be snug & secure but not tight.

Ensure the netting is opened up all the way over the head to allow light to penetrate.

Now once again stretch netting down to the nape of the neck and up to the forehead.



<u>Most Important Step</u>

Once all is in place and secure, unhook and reattach the velcro tabs to pull up/down/midline as head shape dictates.

The end result is a mask that stays on better giving the nurse more time for other things. Protects the eyes better & allows more light to the head.

Take time to save time !

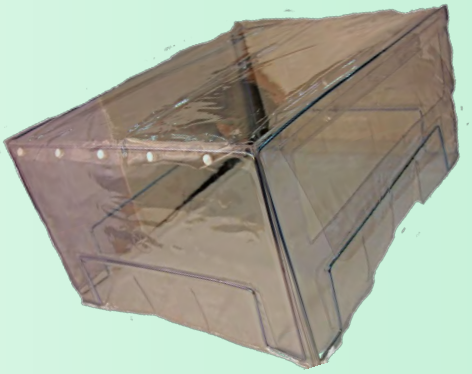
Climate Cover III

"The perfect micro-environment"

- Reduces insensible water loss and cold stress
- Reduces energy cost as it maintains body temperature
- Becomes an OXY-BODYHOOD when infant is off the ventilator
- ****Warning must use with O_2****

Order #	Product Description	Bx Qty
Climate Cover III		
02E	Thermoregulation Oxy-Body Hood 19x25x10	6

- Can stay in place for most care with easy access Arm Ports
- Nurses can do good developmental care and positioning
- Can be X-rayed through
- Maintains a neutral thermal environment even if/when heat source must be removed for a brief time



- For removal in case of emergencies or other procedures all lines and tubing go under the bottom arches on all 4 sides

Climate Cover III

No more cold stress

Can make every radiant warmer a

"Poor-man's Giraffe"

Iso-Sphere "Quillo"

Universal Isolette Cover

Lights, Sounds, Action Too Much ! !

Infants in the NICU are bombarded with constant noise, harsh lights and painful procedures. These tiny babies learn quickly that when they are covered they do not get poked, prodded and stuck. Reducing stress promotes faster healing, ideal growth and proper development which in turn reduces hospital stays with better outcomes.

- 8 ounce quilting to reduce noise & light
- Machine washable and reusable
- Cotton/poly blend & flame resistant
- Gray non-stimulating inside reduces stress and promotes better rest/sleep

These covers serve a great purpose!!

Order #	Product Description	Bx Qty
Iso-Sphere Cover		
03DD	Universal Isolette Cover Fold into a pocket "Quillo"	6

These flame resistant covers not only fit over any isolette, bassinette or even cribs, they also easily cover the "Giraffe" as well. When not in use it folds into itself to make a pillow or "Quillo". It can also be labeled with your hospital and/or the baby's name and birth date for a perfect keepsake from the NICU.
Can also be carried in your hospital's gift shop.

Iso-Sphere "Quillo"

Universal Isolette Cover "Quillo"

- More than a simple Isolette cover
- Also a quilted baby blanket that folds into a "Quillo"
- Great discharge gift
- Can be personalized for baby and/or your hospital
- Machine washable cotton/poly blend
- Flame resistant

Heavenly Foam

- Visco-Elastic, first developed by NASA
- Latex free memory foam
- Perfect topper for the neonatal bed
- Reduces surface tension, pressure points & stress
- In 2 sizes and is 5/8 of an inch thick

Heavenly Foam is included and used with Cuddle Up. Note use with other products as well as Bed Buddy to provide needed soft rebound and boundaries.

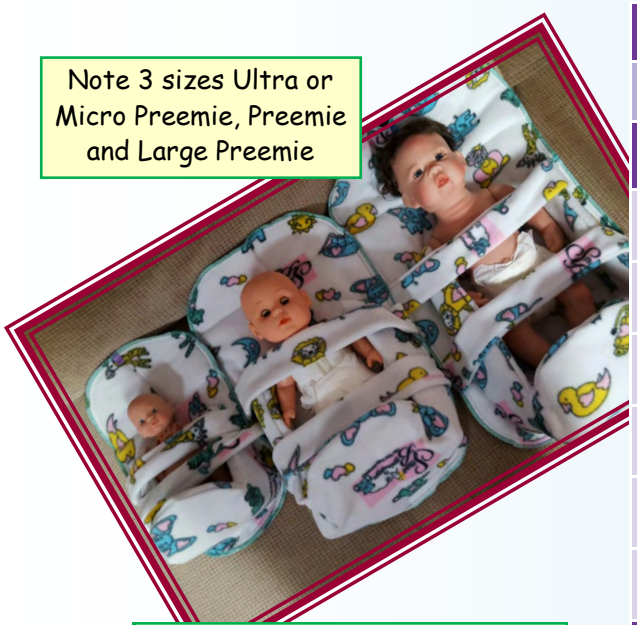
- Close with sticky dots

Cuddle Up "Hug"

With Adjustable Or Removable Head Roll

The Cuddle Up "Hug" is so easy to position, cuddle and hug your preemie as if they were still in the womb. It quickly surrounds and interfaces with infant, providing soft boundaries. The foot and side walls are memory foam sealed within our wipe clean vinyl that has a 5 year shelf-life. Just wipe with any disinfectant and wash and replace with any cover and it's ready to go.



Note 3 sizes Ultra or Micro Preemie, Preemie and Large Preemie

Removable and wipe clean vinyl foot and sidewalls; Note high bottom to keep legs in a good fetal position

Posture Pillow Sampler Kits

*****Reference Article**
Premature Infants: A Later Look
NYU Child Study Center
"Positioning the preemie can also influence future development. For example, preemies may be routinely left to lie on their backs, a position that differs from the natural curved fetal position they would maintain in utero. This can result in a shortening of the scapula muscles between the shoulder blades, causing a restricted range of motion and later motor problems. Thus, the older infant may be unable to appropriately reach for objects in front of him..."

- Softer nipple for premature infants
- Restful non-nutritive suck
- Won't easily fatigue infant
- Recommended by Lactation Consultants

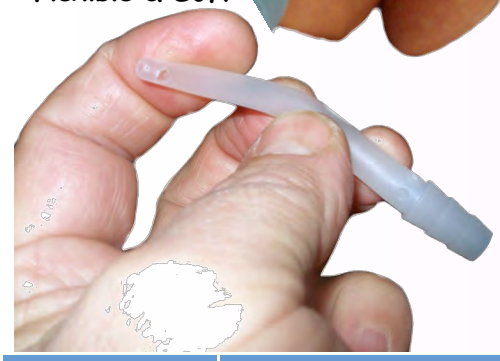
Bebeonkers

Webeonkers

Bebeonkers II

Bebeonkers II (16-2) Our original patented design is an Oral/Nasal suction device that does not grab tissue and effectively removes the most tenacious secretions, quickly and without compromising the infant.
Now available: 16-0 Webeonkers for the ultra preemie infant, just like the 16-2 but smaller.
Packaged six per bag.

Flexible & Soft



Bebeonkers I (16-1) was designed for the Ultra Preemie infant to facilitate quick removal of secretions both nasally and orally but still retains a three-hole configuration for safe oral care without hurting baby.

Remember "Do No Harm"

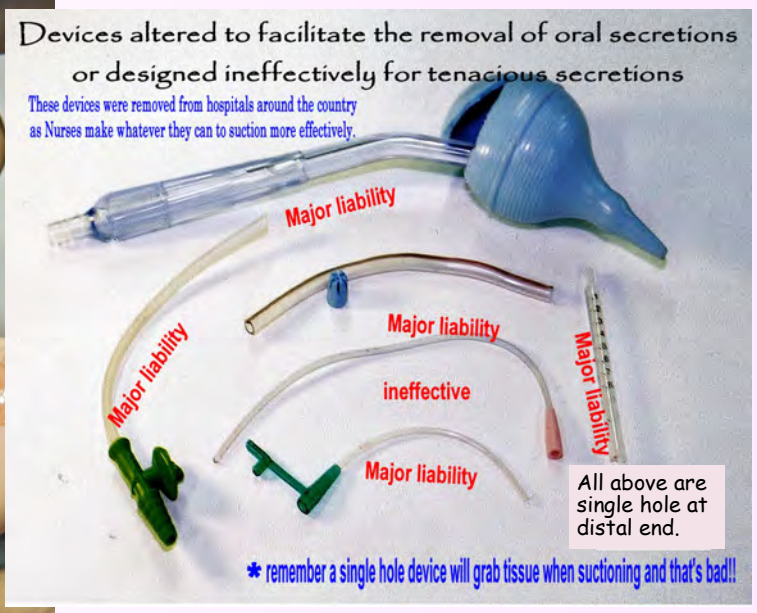
Bebeonkers I

Bebeonkers

The Problem



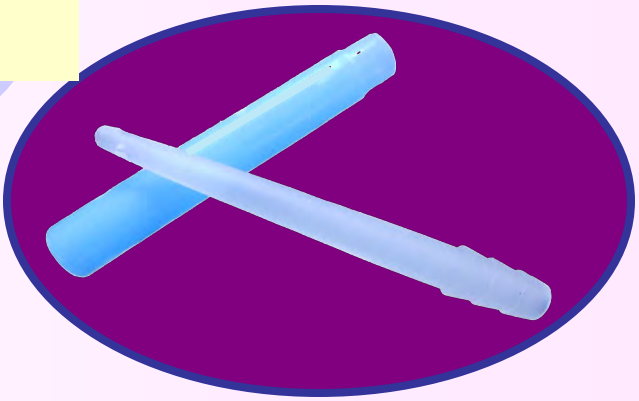
Because there has never been an appropriate device for suctioning intubated or newborn infants, doctors, nurses and therapists have been using and creating inferior one-hole devices. They endanger the infants and make the hospital and medical professional liable if an infant is injured.
The patented
"BEBEONKERS" is that right device!!
It is the right tool for the right job.
Two or more holes and a tapered inner wall does the job quickly and without tearing tissue.

The Solution

- Patented
- 2 or more holes
- Bebeonkers has 3
- Does not grab tissue
- No trauma
- No harm

"Sometimes you just can't stand by when things are being done that can hurt a baby. We saw a problem that was international and made a product to solve it!" *-Philip N. Rogone PA. RCP.*

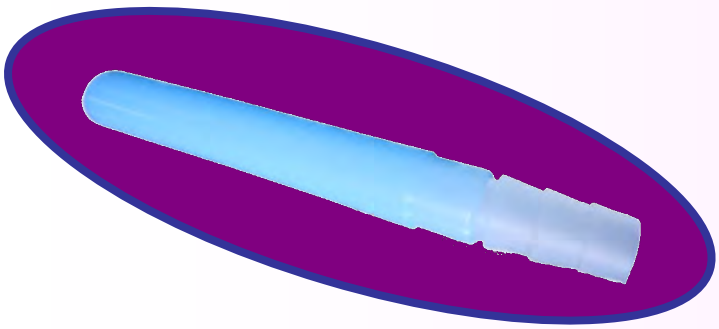
Bebe Keeper Kover



Can be used up to 12 hours on the same patient, or per hospital policy.

Bebe Keeper Kover is an effective cover to keep the Bebeonkers clean.

Can be used on Bebeonkers I and Bebeonkers II with suction on or off, protecting the device while not in use.



Order #	Product Description	Bx Qty
Bebe Keeper Kover Only		
16-3	Bebe Keeper Kover for Bebeonkers 6 pcs/bag, 50 bgs/cs	300

Can also be used with the Bebe-Ball.

Note new blue translucent color

Bebe-Ball

Bebe-Ball

- Bulb suction adaptor for Bebeonkers 16-0, 16-1 and 16-2
- Helps prevent damage that occurs if one-hole device accidently touches the sensitive mucosa of a newborn or preemie
- Disposal after 12 to 24 hours or per hospital policy to prevent infection is recommended
- Use on transports or when power is unavailable and STAT suctioning is required
- Standard bulb syringe has one hole and is inappropriate because it can grab and tear tender tissue too

Bebe-Ball Manual Suction Device

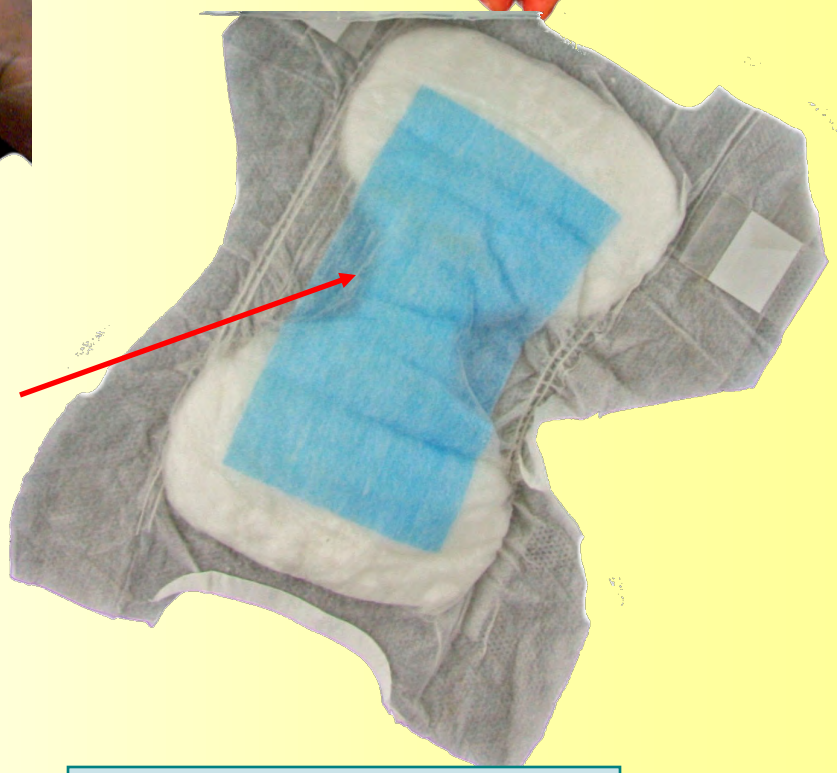
Order #	Product Description	Pkg Qty
BeBe Chix Under Pads		
19A	Infant Under Pads 12" x 10"	20

Cuddle Buns

What makes our diapers so special?



The answer …...
The narrow crotch.
Our pads are figure eight in shape. This helps keep baby positioned to prevent abduction.

***Ref: article:** NYU Child Study Center*

Premature Infants: A Later Look

" Correctly sized diapers is one such simple invention. For example, it was found that preemies who are put in diapers that are too large must keep their legs spread apart in order to accommodate the extra fabric. This resulted in incorrect turn out of the hips and thus later motor problems. "

Cuddle Buns also have NO exposed plastic that can stick to baby's sensitive skin, and they have hook & loop attachments instead of tape.

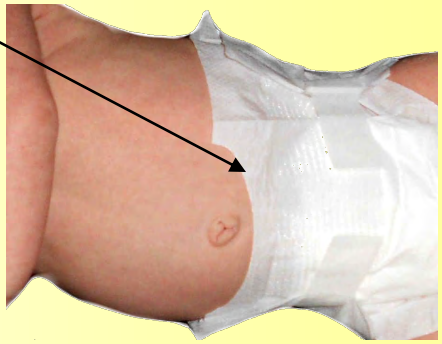
Order #	Product Description	Bx Qty
Cuddle Buns Developmental Diapers		
21A	Preemie Size fit infants 2-4 lbs or 1300-2000 gms	360
21B	Large Preemie fit infants 4-6 lbs or 1850-2750 gms	360
21C	Ultra preemie fit infants under 2 lbs or 1300 gms	360

Cuddle Buns

- A crotch small enough to prevent abduction
- Double elastic that really works to prevent leaks
- A one way liner to keep baby dry

- No gel to swell
- You can easily get a urine specimen
- A cut out to keep diaper away from umbilical lines

Note: Diaper is too big. Legs are spread wide.



"The making of a preemie diaper was very difficult but the dangers to the baby with legs abducted and plastic tearing their sensitive skin kept me on course to find a solution. It was a 5 year struggle to produce a better diaper."

-M. Sharon Rogone RN

Beary Small

Bili-Buns Phototherapy Diapers

The Beary Small Economical Diapers 22A-22B-22C are designed with a narrow crotch and made with SAP for those situations where extra absorbency is required. Made with hook and loop attachments and newly improved all white opaque outer layer and no tape to stick to sensitive skin.
And now our Beary Small Diapers are permeable by photo therapy lights.

Order #	Product Description	Bx Qty
Beary Small Economical Photo Therapy Diapers		
22A	Preemie fit infants 1.5-2.5 lbs or 800-1300 gms	360
22B	Lg. Preemie fit infants 2.5-4 lbs or 1300-1600 gms	360
22C	Ultra preemie fit infants under 1.5 lbs or 800 gms	360

Beary Small

Bili-Buns Phototherapy Diapers

Beary Small Bili-Buns

- Still the same but now better
- Bili-Light penetrates diaper
- Now white opaque outer layer
- Hook & loop closure & no tape
- Economical
- Very absorbent with gel
- 3 preemie sizes
- Narrow crotch

Test showing light penetrating the Bili-Buns Diaper through the fluff.
