# Calming Cuddle Blanket

Available in wipe clean, reusable material and Knit, Fleece or Disposable fitted covers

The Calming cuddle blanket is part of therapeutic positioning and when used with other Small Beginnings products such as the Diana Bed Buddy, Bed Buddy, or a simple swaddle, the clinician is promoting improved rest and growth. If the baby feels more comfortable and contained, they are more likely to be calm, sleep sounder, and gain more weight, which could lead to an earlier discharge.

Blanket is machine washable and can be used reused on different patients. Replace after 3 months of continual use.
